Welcome to INEX...

Welcome to INEX, a leading ceramic tile company located in Turkey. Our mission is to provide our customers with the highest quality ceramic tiles from around the world, while also striving to be at the forefront of innovation and technology in the industry.

At INEX, we believe that our commitment to using the latest technology in manufacturing processes of our suppliers sets us apart from our competitors. We work with trusted suppliers in India, Turkey, and Spain who source the finest raw materials and produce top-quality ceramic tiles.

We are proud to be a global company, selling our products to three different continents. This has allowed us to gain valuable insights into the unique preferences of customers in different regions, and we use this knowledge to present products that meet their specific needs.

We are also committed to being environmentally responsible. We understand the importance of preserving the natural world, which is why we take great care to ensure that manufacturing processes of our product are as eco-friendly as possible.

At INEX, we are more than just a ceramic tile company. We are a team of passionate individuals who are dedicated to providing our customers with exceptional products and services. We believe that our commitment to innovation, technology, and the environment sets us apart from the competition, and we look forward to the opportunity to work with you.

At INEX, our unwavering commitment to environmental sustainability permeates every facet of our operations. We recognize that our choices today hold the power to shape a brighter tomorrow for all. As a prominent materials company, we proudly stand as pioneers in the realm of environmental sustainability, actively working towards a more eco-conscious future.

1. Responsible Sourcing: At the heart of our sustainability journey lies the ethos of responsible sourcing. We place a premium on materials that exhibit low environmental impact, favoring those that are renewable, recyclable, or have minimal ecological footprints. This deliberate approach to sourcing materials not only reduces the strain on our planet's natural resources, but also actively contributes to the preservation of delicate ecosystems.

2. Eco-Friendly Production: Our relentless pursuit of sustainability extends to our state-of-the-art manufacturing processes. These processes are meticulously designed to minimize waste generation, curtail energy consumption, and mitigate emissions. This steadfast commitment ensures that our production facilities consistently meet the highest environmental standards.

3. Recycling and Circular Economy: INEX fervently champions the principles of the circular economy. We ardently advocate for recycling and the reuse of materials, thereby reducing waste generation and conserving valuable resources. Our dedication to recycling not only serves as a resounding testament to our environmental stewardship but also provides our clientele with sustainable and economically advantageous solutions.

4. Energy Efficiency: We firmly grasp the pivotal role of energy efficiency in minimizing our environmental impact. Our facilities are thoughtfully designed to maximize energy efficiency, and whenever feasible, we harness renewable energy sources. This dual-pronged approach not only reduces our carbon emissions but also bolsters our cost-efficiency.

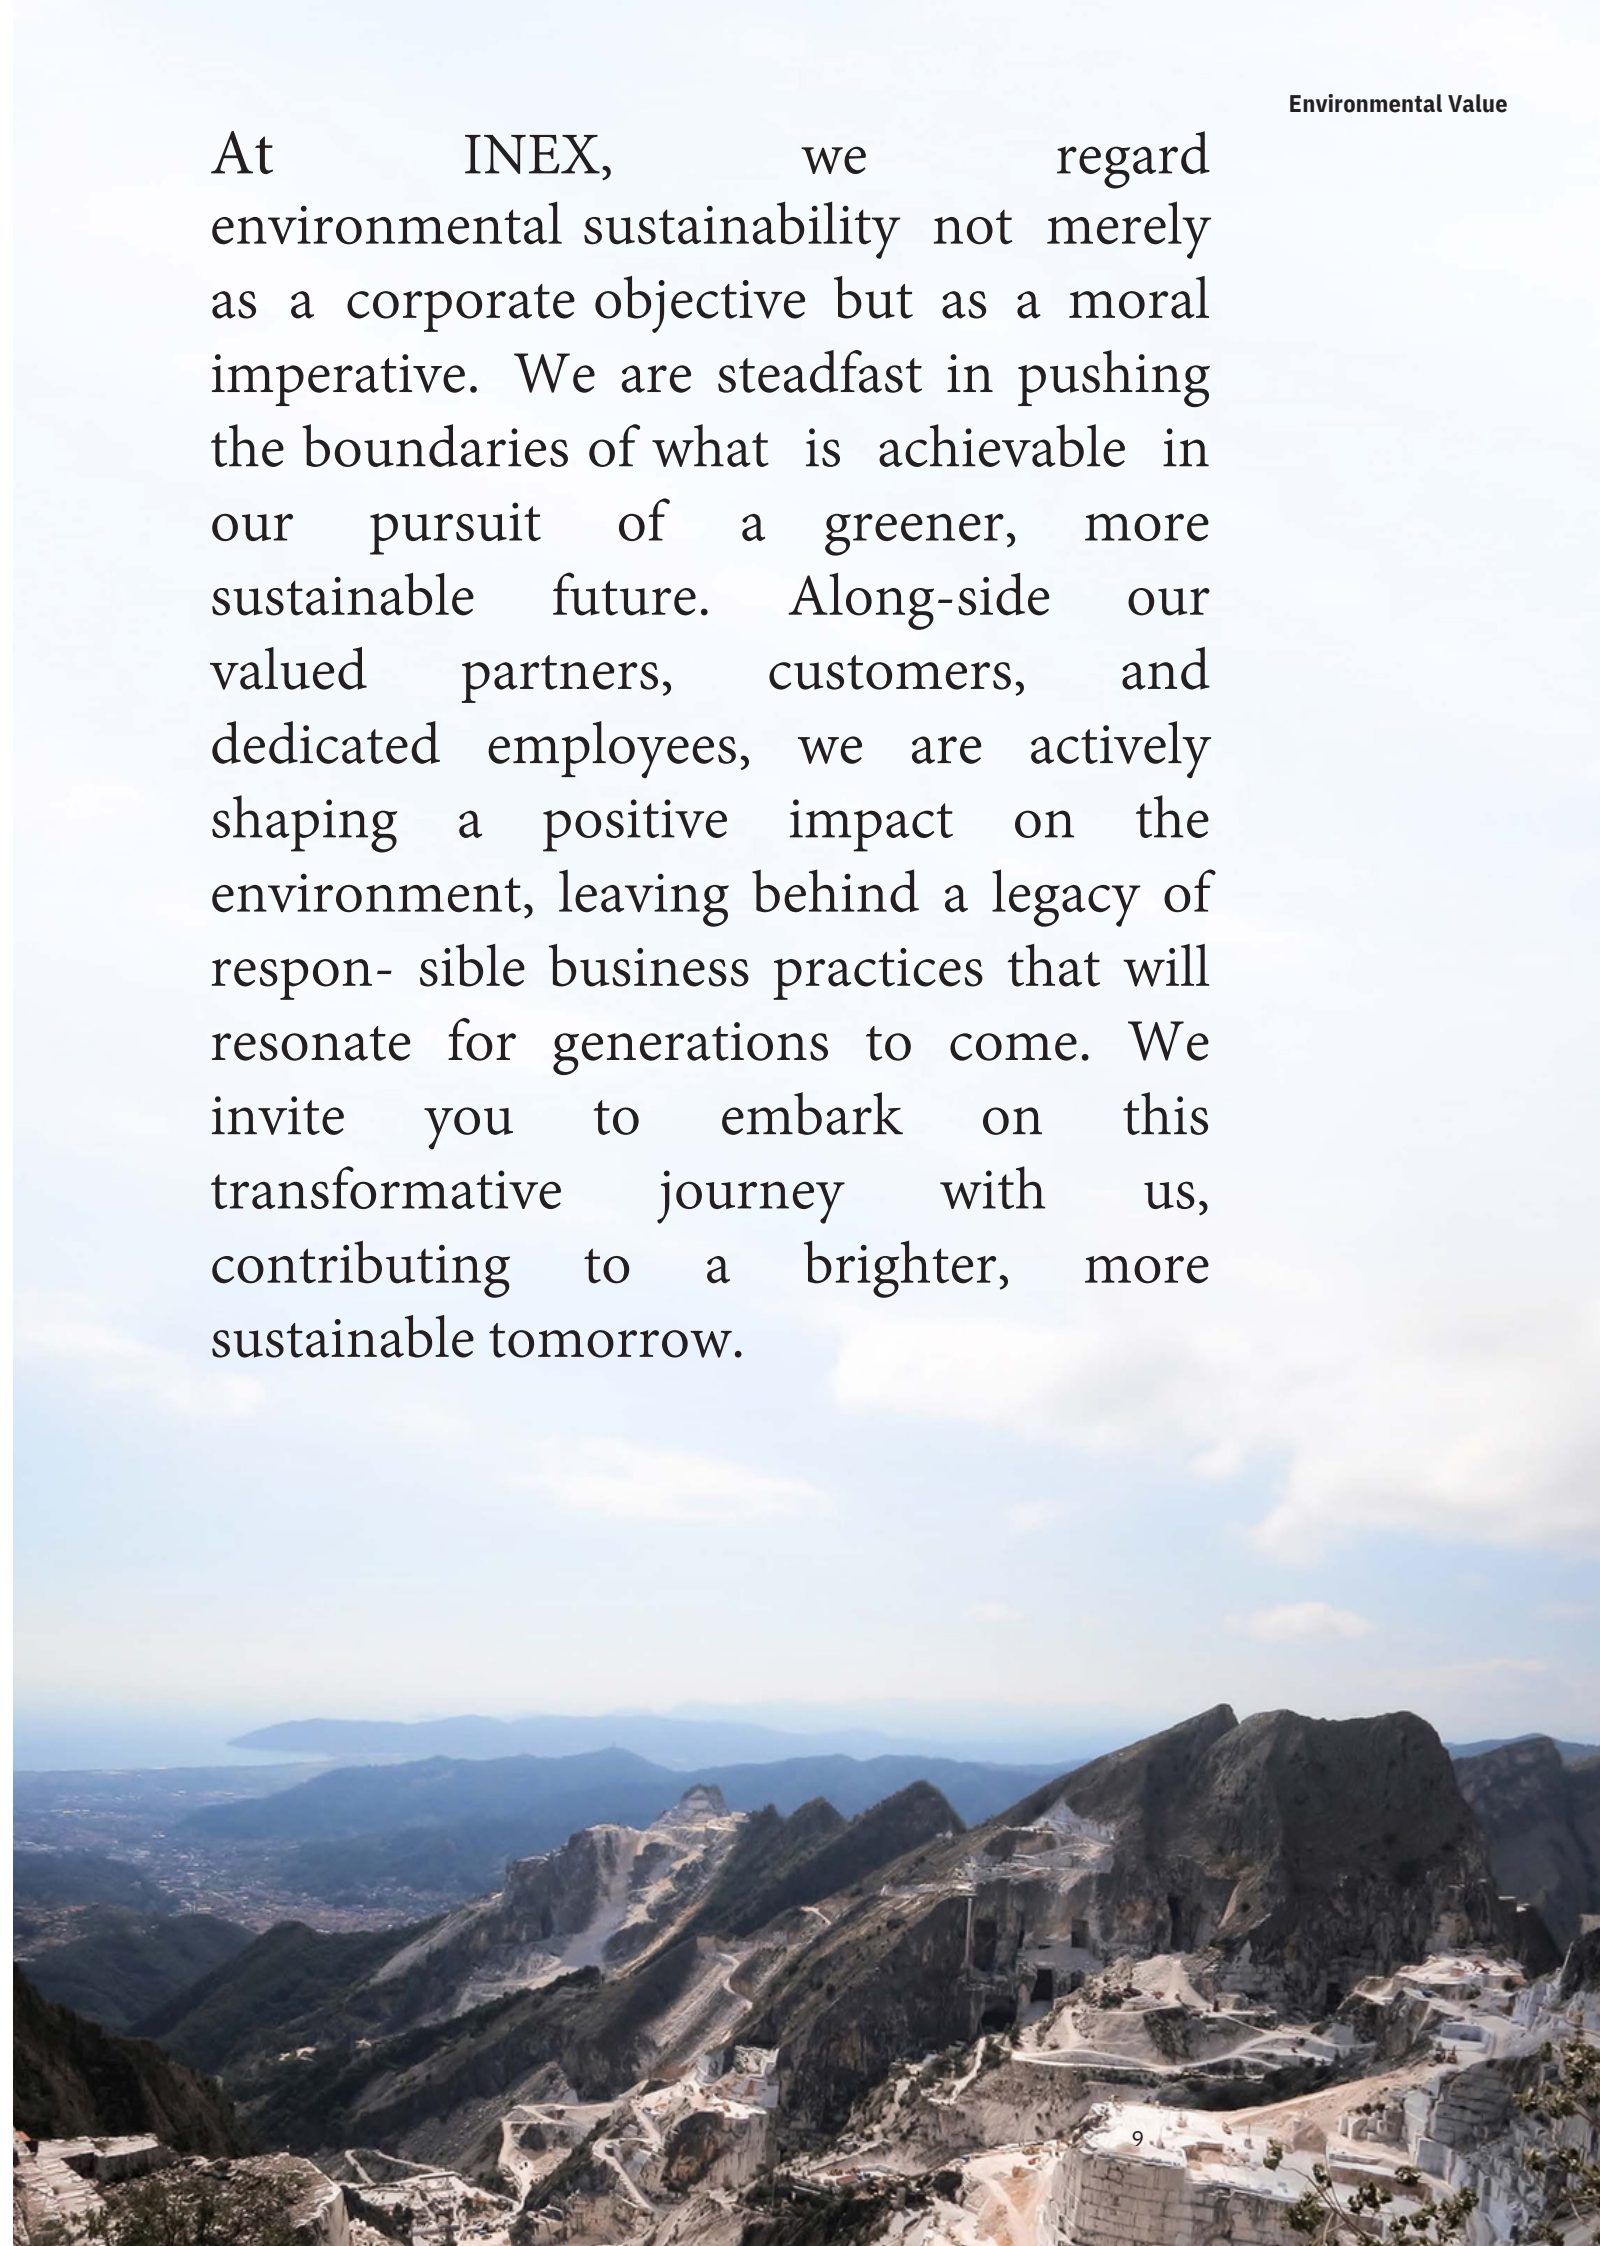

5. Innovation and Collaboration: We fervently believe that sustainable solutions are born through collaborative innovation. To this end, we actively collaborate with esteemed research institutions, environmental organizations, and industry partners to develop cutting-edge, eco-friendly materials that seamlessly align with the ever-evolving demands of our discerning clientele.

6. Transparency and Accountability: At INEX, we hold transparency and accountability in the highest regard when it comes to our sustainability endeavors. Regularly, we furnish comprehensive reports detailing our environmental performance, thereby establishing clear benchmarks and goals for continuous improvement.

7. Customer-Centric Approach: We empathize with the concerns of our customers regarding the environment. Therefore, we proffer an extensive array of sustainable materials and products that satiate their needs without compromising quality or performance. We ardently aspire to assist our customers in making environmentally responsible choices.

8. Employee Engagement: Acknowledging that our employees are our most valuable assets, we empower them to become environmental stewards. Through comprehensive training, educational initiatives, and opportunities for active participation, we inculcate a culture of environmental responsibility among our dedicated team members.

At INEX, we regard environmental sustainability not merely as a corporate objective but as a moral imperative. We are steadfast in pushing the boundaries of what is achievable in our pursuit of a greener, more sustainable future. Along-side our valued partners, customers, and dedicated employees, we are actively shaping a positive impact on the environment, leaving behind a legacy of responsible business practices that will resonate for generations to come. We invite you to embark on this transformative journey with us, contributing to a brighter, more sustainable tomorrow.

Our training center

August 6, 2021

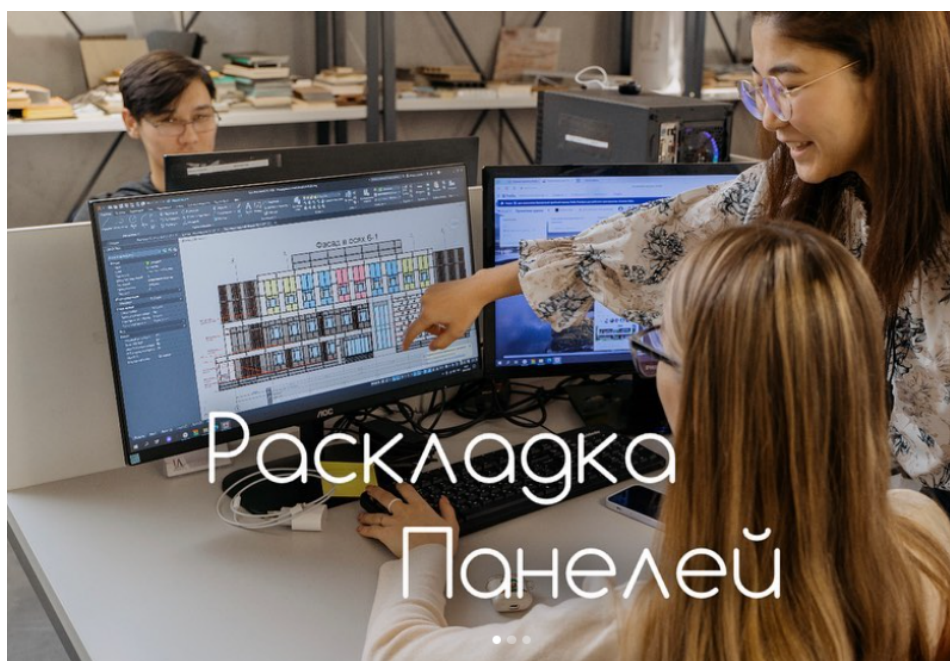

A specialized training center, equipped with the latest technologies, was opened within the framework of the Memorandum of Cooperation between the International Educational Corporation, which is the successor to the Kazakh Head Academy of Architecture and Civil Engineering, the flagship of architectural and construction education of the Republic of Kazakhstan, and Invesco Asia LLP.

Our task is to train highly qualified personnel in production. Students will take part in real projects of the Invesco Asia company and solve real production problems. This will allow students to gain invaluable practical experience, develop their skills and become leading specialists in the architectural and construction industry.

Currently, Invesco Asia employs more than 50 IOC students in the preparatory field: "Architecture and Construction".

The IOC and Invesco Asia plan to develop joint educational programs covering the full production cycle, which will ensure continuity of training for potential applicants. And also, on the basis of the training center, in addition to training new personnel, events will be held that are useful for professionals in the construction and architecture industries.

Material Values

HYGIENICIGIENICA . HYGIÉNIQUE . HYGIENISCH

Ceramic is one of the most hygienic of all materials. It's odourless and easy to clean using any household detergent. La ceramica è uno dei materiali più igienici, non fa odore, si pulisce facilmente con tutti i prodotti per la pulizia della casa. La céramique est l'un des matériaux les plus hygiéniques, elle ne sent pas, elle est nettoyée facilement avec tous les produits de nettoyage ménagers. Keramik ist eines der beliebtesten hygienischen Materialien, geruchlos, leicht zu reinigen mit allen Hausreinigungsmittel.

STABLE . STABILE STABLE . STABIL

A ceramic floor is practical, stable and can be easily skillfully installed in shops, restaurants, offices and surfaces of all kinds. Un pavimento in ceramica è pratico e stabile e si posa facilmente nei negozi, nei ristoranti, negli uffici e in ogni tipo di locale. Un sol en céramique est pratique et stable et peut être facilement installé dans les magasins, restaurants, bureaux et dans tous les types de locaux. Ein Keramikboden ist praktisch und stabil und passt ohne probleme in Geschäfte, in Restaurants, Büros und Lokalen allen Arten.

LONG-LASTING

Ceramic is a durable and hard-wearing material. It's easy to clean and always looks as good as new. La ceramica è un materiale duraturo, inalterabile, si pulisce facilmente ed è sempre come nuovo anche col passare del tempo. La céramique est un matériau durable et inaltérable, elle est facile à nettoyer et est toujours comme neuve même au fil du temps. Keramik ist ein dauerhaftes Material, unveränderlich, leicht zu reinigen und auch mit der Zeit ist immer so wie neu.

IT DOES NOT BURN NON BRUCIA . NE BRÛLE PAS . FEUERFEST

It does not burn and in the event of fire does not release substances that are harmful to people or the environment. In caso di incendio, la ceramica non rilascia sostanze nocive, né per l'uomo né per l'ambiente, perché non brucia. En cas d'incendie, la céramique ne dégage pas de substances nocives, ni pour l'homme ni pour l'environnement, car elle ne brûle pas. Im Brandfall löst sich die Keramik nicht Schadstoffe, weder für den Menschen noch für die Umwelt, weil es nicht brennt.

RESISTANT RESISTENTE . RÉSISTANT . BESTÄNDIG

Ceramic is a strong material that does not change shape or freeze and is resistant to even the most aggressive chemical detergents. La ceramica è un materiale forte perché non si deforma, non si scioglie e resiste ai detergenti chimici più aggressivi. La céramique est un matériau solide car elle ne se déforme pas, ne gèle pas et résiste aux détergents chimiques les plus agressifs. Keramik ist ein starkes Material, weil verformt sich nicht, z friert nicht ein und widersteht aggressiveren chemische Reiniger.

VERSATILE . VERSATILE POLYVALENT . VIELSEITIG

With its infinite variety of sizes and surfaces, ceramic is suitable for any application, whether floors or walls, countertops or tables. La ceramica – con la sua infinita varietà di formati e superfici – è adatta per ogni ambiente, superfici – per ogni ambiente, ideale per pavimenti e pareti, per piani di lavoro e tavoli. La céramique – avec sa variété infinie de formats et de surfaces – convient à tout environnement, idéale pour les sols et les murs, pour les plans de travail et les tables. Keramik mit der unendlichen Vielfalt von Formaten und Oberflächen ist für jeden Raum geeignet, ideal für Böden und Wände, für Arbeitsflächen und Tische.

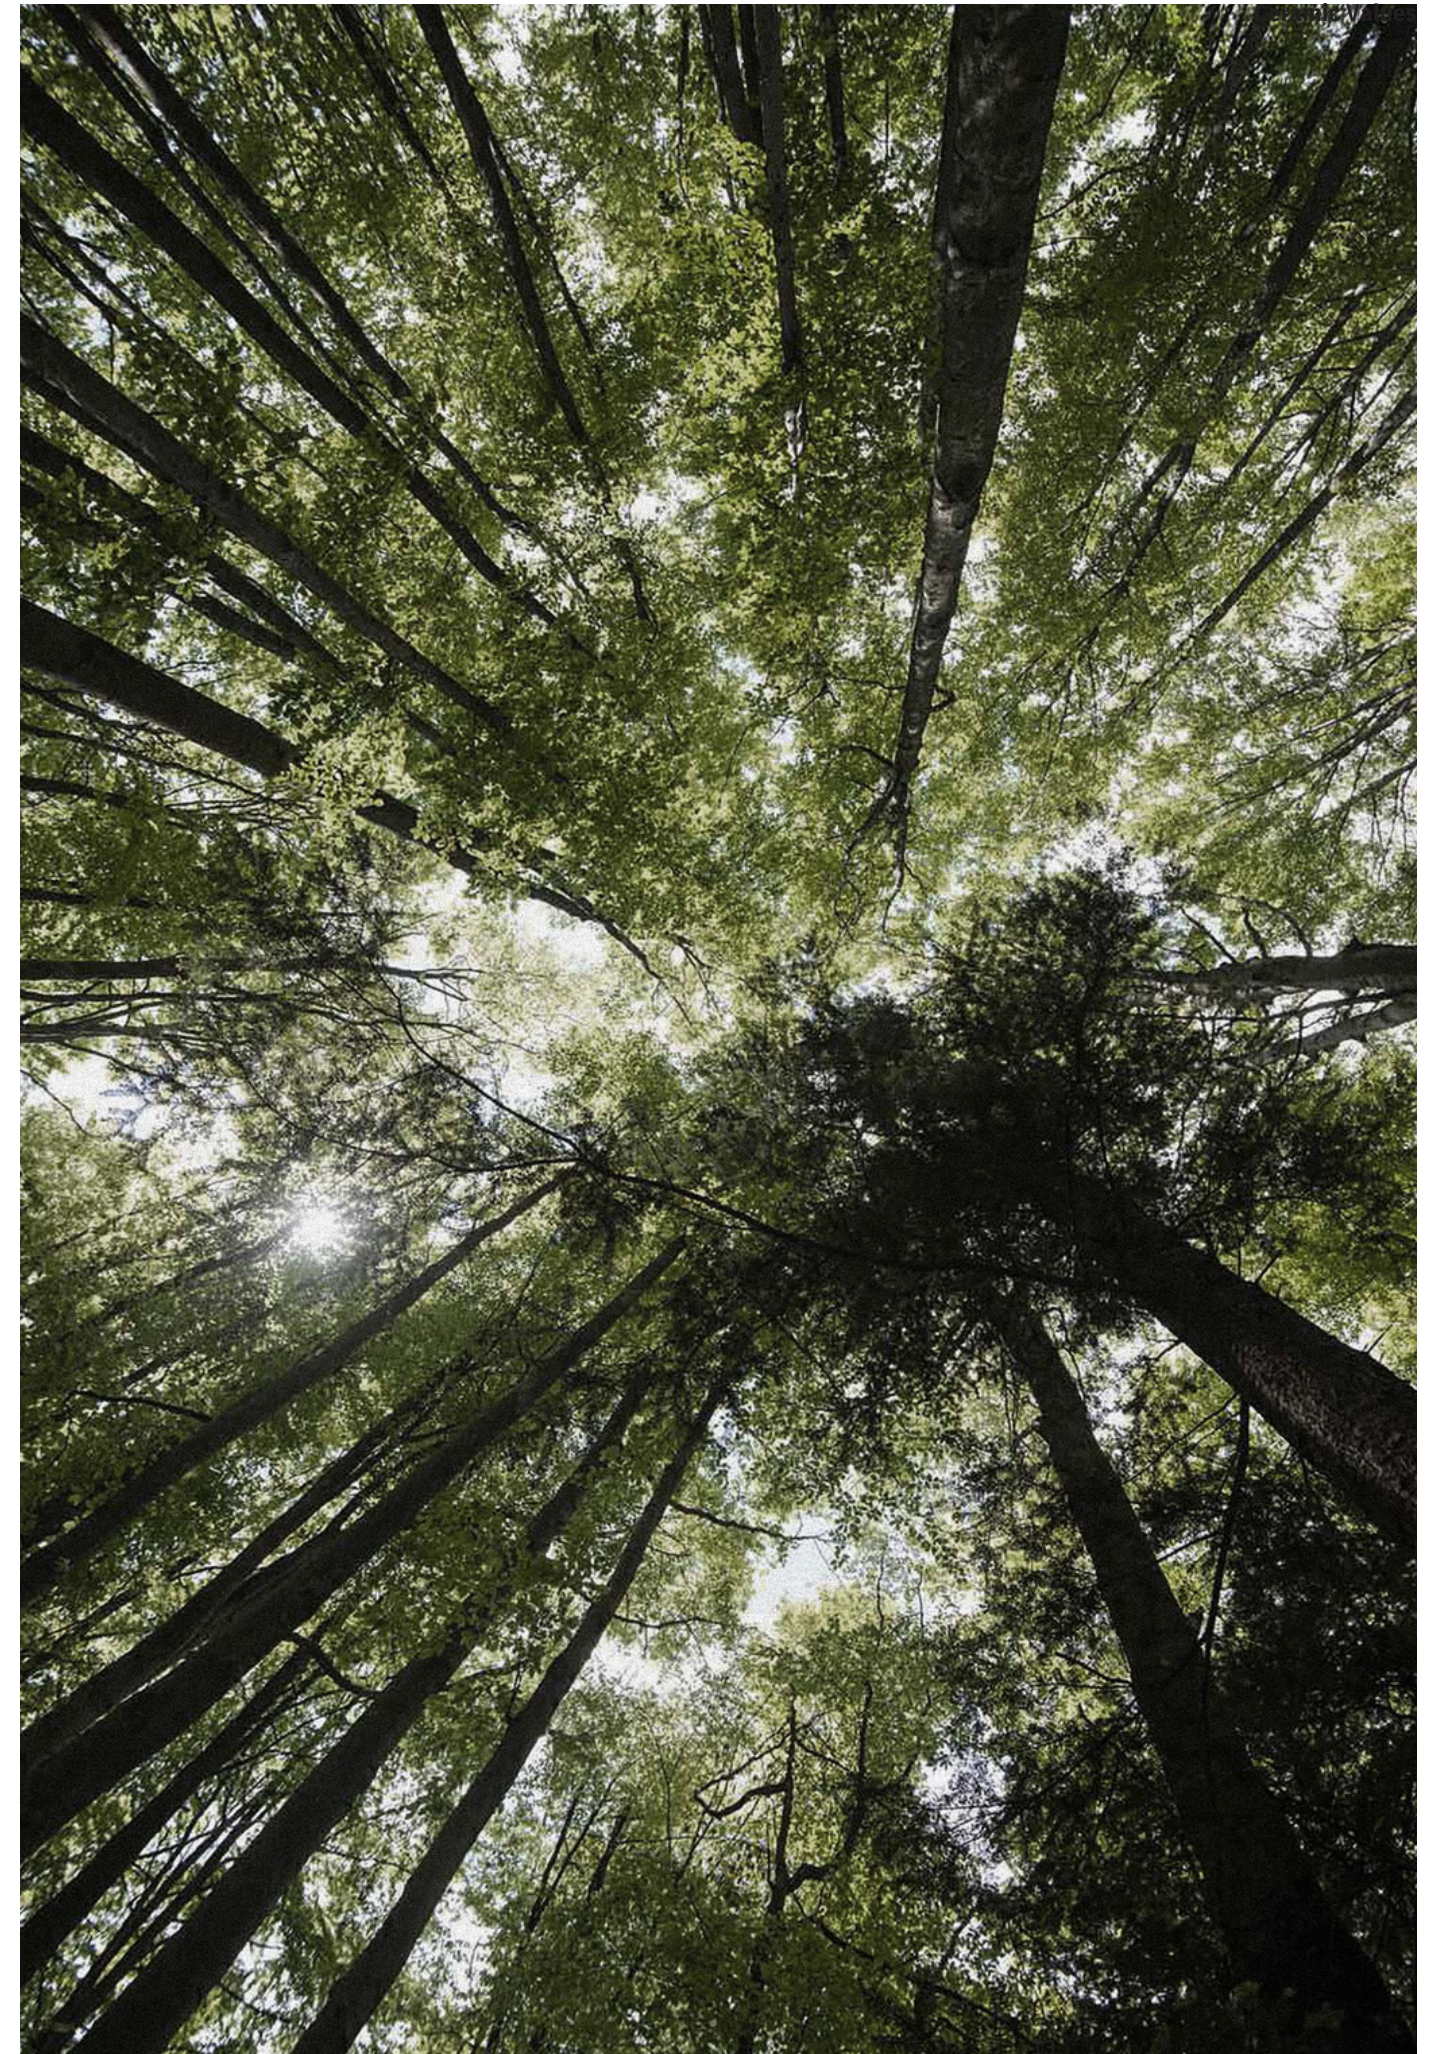

SAFE ICURA . SÉCURITÉ . SICHER

Ceramic is a safe, natural material that originates from the earth. It does not contain plastic and is completely recyclable. La ceramica è un materiale sicuro, che viene dalla terra, quindi naturale, non contiene plastica ed è completamente riciclabile. La céramique est un matériau sûr, qui vient de la terre, donc naturel, ne contient pas de plastique et est entièrement recyclable. Keramik ist ein sicheres Material, das kommt von der Erde, so natürlich, enthält es nicht Kunststoff und ist vollständig recycelbar.

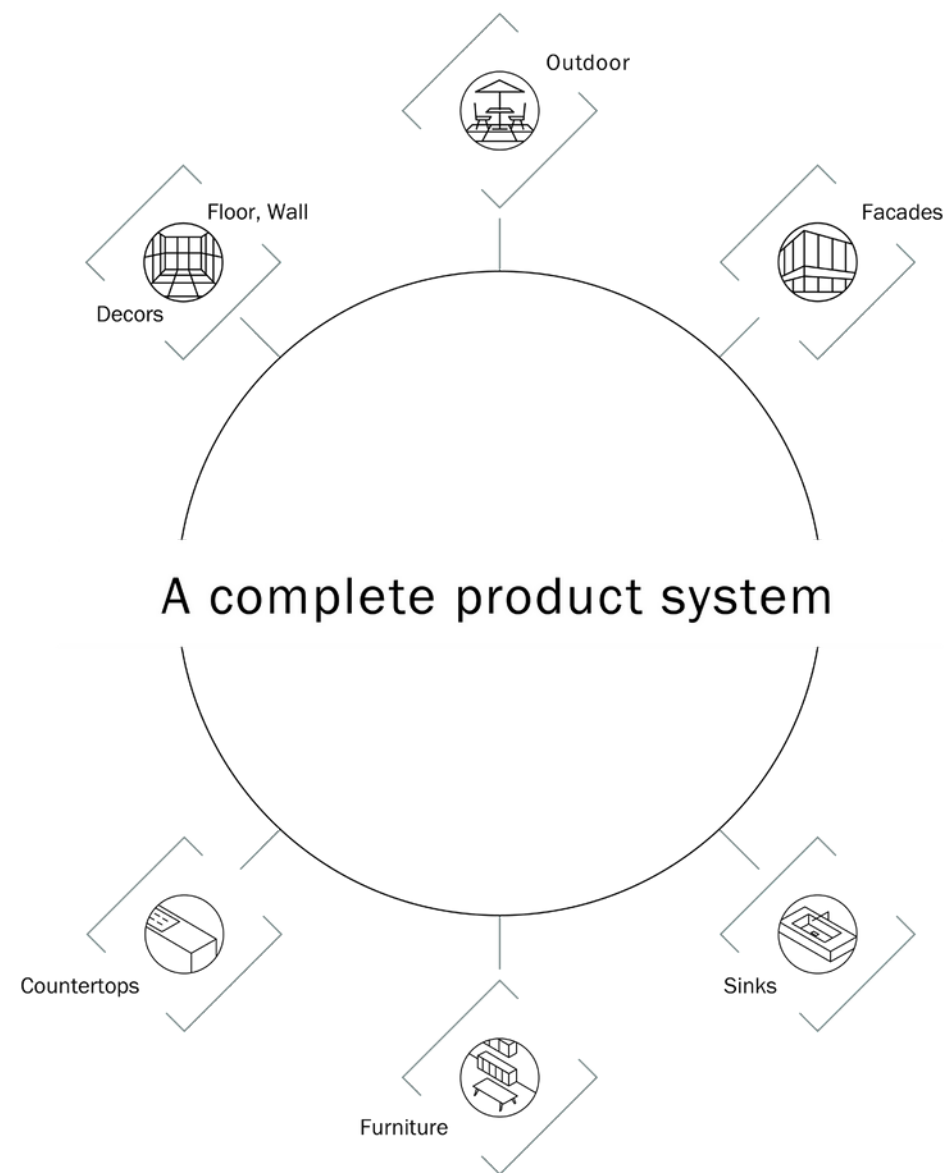

ECOFRIENDLY ECOLOGICA . ÉCOLOGIQUE . ÖKOLOGISCH

Ceramic is a sustainable material that is healthy and environment-friendly because it is produced in full compliance with European and American standards. La ceramica è un materiale sostenibile che rispetta l'ambiente e la salute perché è prodotta in conformità con tutte le normative europee. La céramique est un matériau durable qui respecte l'environnement et la santé car il est produit dans le respect de toutes les réglementations européennes. Keramik ist ein nachhaltiges Material, das die Umwelt und die Gesundheit respektiert, in Übereinstimmung mit allen Vorschriften der europäischen Normen.

Areas of Usage

The main principles of our team:

1. *Transparent honesty both towards clients and to each member of our team*
2. *Professionalism and reliable reputation*
3. *«No» to everything that contradicts the law and ethical human standards*
4. *Give a smile, since a smile is a sign of a friendly and humanistic relationship between people*

Inex is an exclusive distributor of materials from a number of global brands for both interior and exterior decoration. We present to you a wide range of large format panels for ventilated facades and interiors, which are distinguished by their high quality and durability. Our range of materials also includes HPL panels, fiber cement, clinker, metal panels and terracotta from various manufacturers.

An important part of construction is the facade. A lot depends on its appearance and technical properties: the climate inside the house, the rationality and benefit of investing in the finishing of the building, the daily comfort of use, and the aesthetic pleasure of the result. We strive to offer our customers solutions that are suitable for different climate conditions and specific requirements. Regardless of whether the object is located in the north or south, in an area of severe frost or heat, we will select suitable panels that will serve for a long time and maintain their appearance.

Our company has extensive experience in the field of ventilated facades. The advantages of a ventilated facade are as follows: unique design, ease of installation and ease of repair, wear resistance and long service life, noise insulation, the possibility of insulation, no freezing, moisture resistance and the ability to install on uneven walls.

We have a huge team of engineers who undergo training annually in special centers that we open together with local universities. We strive to constantly improve our materials, so we conduct various tests in certified laboratories to determine their strength and reliability. We test materials for fire resistance, frost resistance, resistance to ultraviolet radiation, wind, seismic influences and external damage. Our goal is to provide materials that will be durable and reliable in any operating conditions.

People say: «Clothes speak for a man». Likewise, construction projects are assessed by their facades. We help each client realize their ideas and achieve the desired result. We provide full engineering support for the project, starting from the selection of materials suitable for the project and design development, and ending with quality control of the work.

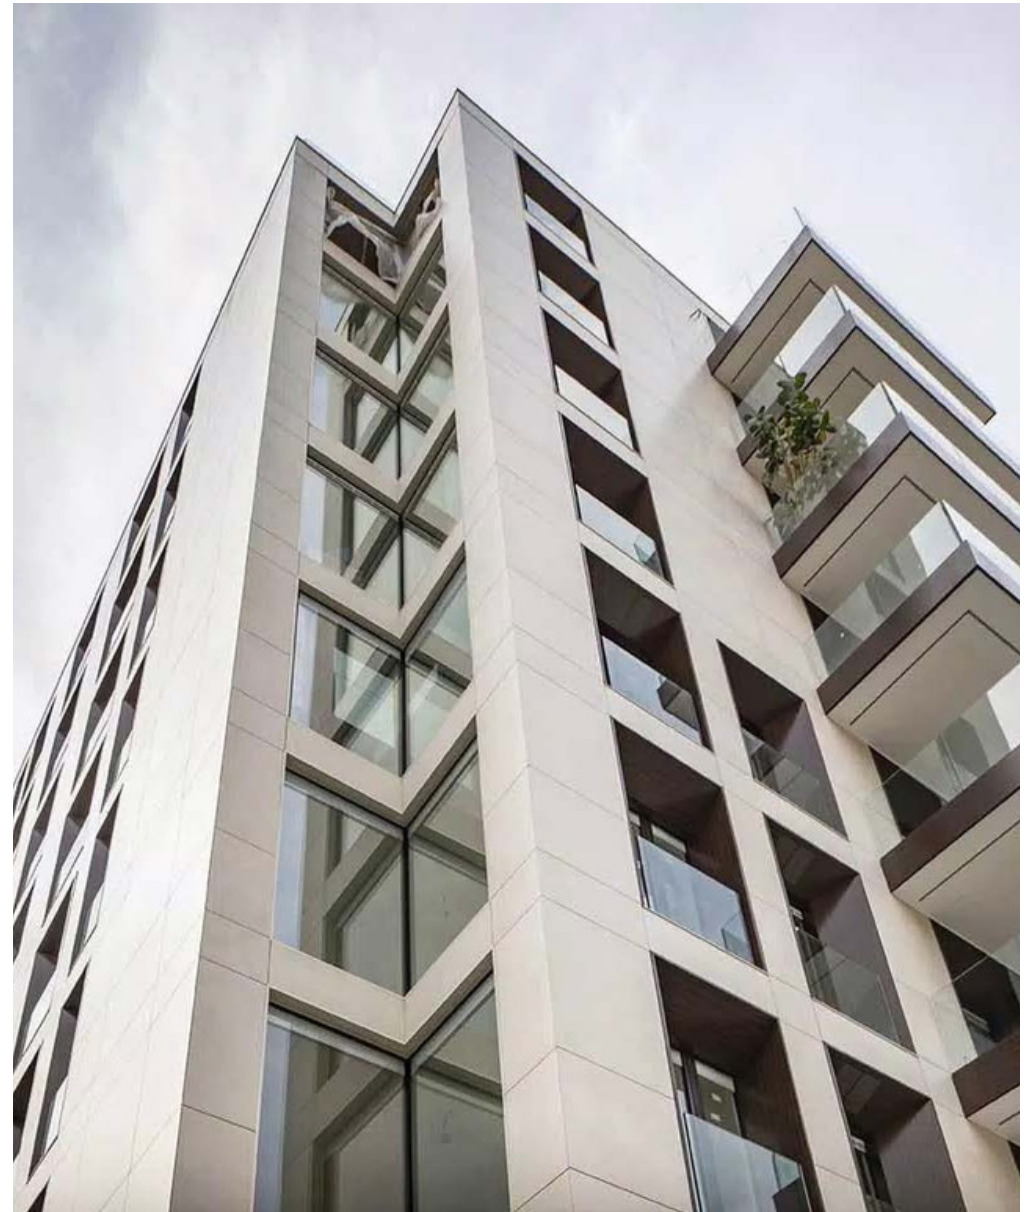

We are proud that many cities in such countries as USA, Canada, many European cities, as well as in UAE, Turkey, Russia, Kazakhstan, Uzbekistan, Kyrgyzstan are becoming more beautiful and functional due to our materials and technologies. Our goal is to create not just buildings, but real works of art that will evoke admiration and joy in everyone who sees them.

Our flagship is Kalesinterflex ceramic wide-format panels, which have no analogues in the world due to their properties, such as wide-format size, lightness, flexibility, resistance to dirt and scratches, and a huge selection of colors and textures.

Kalesinterflex panels are used both on the facade and in the interior. Interior panels are a universal solution that adds originality and elegance to any room. From classic to contemporary, tiles offer a wide range of designs, shades and textures, allowing you to create unique combinations and captivating compositions. The advantage of ceramic tiles lies not only in their attractive appearance, but also in the high strength and durability of the material. Its surface is easy to clean and does not wear out over time, which makes ceramic tiles an excellent choice for any room: from the bathroom and kitchen to the hallway and living room. Ceramic tiles are also known for being hygienic and moisture resistant, making them an ideal solution for bathrooms and swimming pools. It does not absorb odors and is easy to clean, which allows you to keep the room clean and fresh for a long time. All these advantages make ceramic tiles an indispensable material in creating and updating interiors. Whether it's upgrading a home space or a commercial project, ceramic tiles provide a durable and aesthetically pleasing solution that will last for years to come.

Crafting Beauty, One Clay at a Time...

INEX - Where Artistry Shapes Architecture!

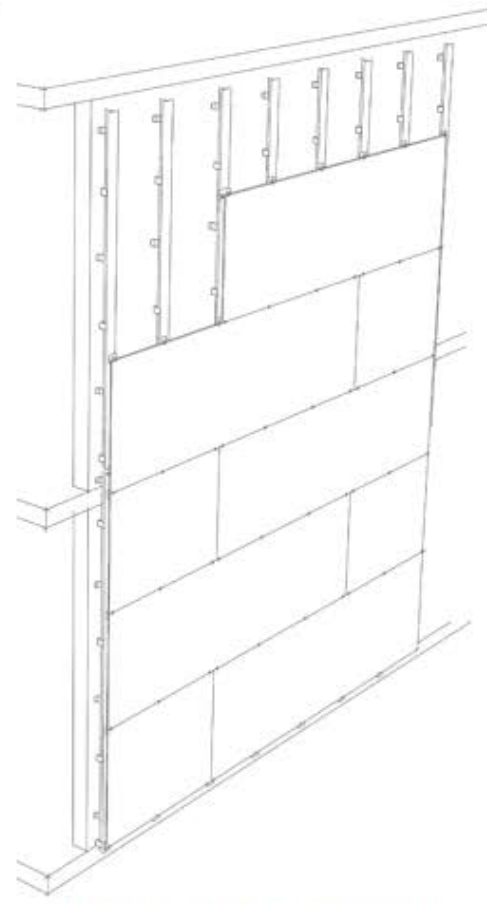

Step into our comprehensive catalog, where the artistry of facade design takes center stage, harmonizing aesthetics with sustainable development. Within these pages, you'll embark on a journey through a world of limitless possibilities, where creativity and innovation redefine architectural potential while honoring our commitment to sustainability. Our offerings transcend traditional boundaries, allowing architects and designers to craft buildings that not only inspire awe but also contribute to a greener, more sustainable future. From intricate patterns that narrate tales of tradition to sleek, contemporary surfaces that redefine modernity, our solutions provide the means to transform ideas into tangible, awe-inspiring structures, all while supporting sustainable development goals. Join us on this voyage through the realm of facade design, where every page invites you to turn architectural dreams into reality, all in harmony with our planet's future.
